

## Sensex zooms 482 pts, Nifty tops 10,600; rupee recovers 13 points

**MUMBAI** The benchmark BSE Sensex gained momentum in afternoon trade yesterday, rallying over 482 points on continued buying by domestic funds and recovery in the rupee amid higher Asian markets. On the other hand, Brent crude futures tumbled to a six-week low of USD 65.16 per barrel. A fall in crude prices is seen as positive for Indian economy, which imports most of its oil requirements. The 30-share barometer stayed in the green through the session on all-round buying. It was trading at 34,565.03 by surging 482.32 points, or 1.41 per cent at 1230 hrs. The index had lost 113.23 points in the previous session following the Reserve

Bank's decision to leave interest rates unchanged that caught the market by surprise. The broader NSE Nifty also soared 137.60 points, or 1.31 per cent, to quote at 10,614.30. Brokers said buying by domestic institutional investors (DIIs) and a mixed trend at other Asian bourses improved the market sentiment. DIIs had bought shares worth Rs 461.19 crore, while foreign funds sold shares to the tune of Rs 1,022.50 crore Wednesday. The rupee, at 64.15 notched up gains against the dollar (intra-day), which spurred the bulls. The broader markets also saw strong buying with BSE small-cap and mid-cap indices rising up to 2.33 per cent.

# India to seek lower oil rates from Saudi Arabia, US

**NEW DELHI:** India will press Saudi Arabia and the US, the world's biggest oil producers, this month for a reduction in oil prices to provide relief to fuel consumers, Oil Minister Dharmendra Pradhan said on Thursday. Saudi Oil Minister Khalid AAI-Falih will visit India on February 23-24 while US Energy Secretary Rick Perry would be here between February 28 and March 1, he said. "We feel oil prices should be reduced," Pradhan told reporters here. In meetings with the producers, India, the world's third biggest oil consumer, would make a case for reasonable pricing of crude and reductions from current high levels, he said. Pradhan was replying to questions as to why the government has not reduced excise duty on petrol and diesel in the Union Bud-

get 2018-19, presented in Parliament last week, to give relief to consumers. Brent crude has lost around 8 per cent in value since reaching a 4-year high to above USD 71 per barrel in late January. It was trading at USD 65.37 yesterday. Asked about former finance Minister P Chidambaram's comments in Rajya Sabha during the Budget debate, he said the government chose to keep the gains arising from falling crude oil prices between late 2014 and early 2016 to provide for funds for free LPG scheme, road and highway construction, education and healthcare. Chidambaram had asked the government what price of crude had it factored in while framing the Budget and if it will raise retail prices or cut excise duty when international prices cross that level. If excise duty are cut, which will be only the second time under Narendra Modi government came to power, the finances will come under severe pressure. Already the government has given a relaxed the fiscal deficit target to accommodate higher spendings. Petrol prices yesterday crossed Rs 73 a litre mark, the highest level since the BJP government came to power in 2014, while diesel touched a record high of Rs 64.15 a litre.

## GOVERNMENT OF MAHARASHTRA PUBLIC WORKS DIVISION, NASHIK QUOTATION NOTICE

**Name of Work -** Rate Quotation Non DSR Items for Preparation of Estimate for FOR STRUCTURAL REPAIRS, WATER-PROOFING & CIVILWORKS FOR ELEVATED WATER TANK IN CIVIL HOSPITAL, NASHIK Tal. Dist. Nashik in the Jurisdiction on Executive Engineer, P.W. Division, Nashik.

Quotation Notice for the following work invited by The Executive Engineer, P.W. Division, Nashik Bhandarkam Bhavan, Trimbak Road, Nashik Tal. Dist. Nashik Phone No. (0253)2583761-64, 2575324) from Reputed and Experienced firm having experience of similar type of work. Sealed quotation to be submitted from 09.02.2016 to 16.02.2016 in office upto 14.00 hrs. Quotation will be opened on 16.02.2016 at 16.00 hrs. (if possible) Notice Detailed Specification will be made available free of cost in the office of Sub-Division Officer, South P.W. Sub Division, Nashik, Bhandarkam Bhavan Premises, Trimbak Road, Nashik Tal. Dist. Nashik.

S.No.	Description and Specification of item	Unit	Rate per Unit
<b>A</b>	<b>Structural Repairs -</b>		
1	<b>H-frame steel scaffolding -</b> Providing and erecting safe, secure and rigid Steel "H" Frame scaffolding by using H frames including all accessories e.g ropes, bracings, MS props etc. complete for safe execution of work including removing the same after completion of work and taking away all material to contractor's own dump and making good damages. The rates are inclusive of testing of entire surface for its looseness, hollowness, weakness etc and allowing loose scaffolding for working of other agencies for other miscellaneous work.	Sq.mt	
2	<b>Breaking Plaster</b> Breaking/chipping out cement plaster of any thickness internal/external carefully by mechanical chipper to avoid any damage to brick wall including cleaning the surface with wire brush and washing the surface, scaffolding arrangement & disposing off debris to contractor's own dump outside the compound. Spec: (As directed by Engineer in Charge) b) External Plaster 25 mm thick	Sq.mt	
3	<b>Chipping of RCC</b> Chipping carefully the loose concrete of disintegrated member without damaging strong concrete by means of sharp means of sharp chisel which should temper regularly of high frequency low impact hammer. Chipping the R.C.C. surface and cleaning the rusted rusted-reinforcement and exposed surface by-wire brush mechanical device or any other established method, brushing of loose particles etc. including scaffolding etc. complete.	Sq.mtr	
4	<b>Anticorrosive Treatment</b> Providing and applying anticorrosive treatment to exposed r/f portion with one coat of alkaline-resistive converter FEOVERT or equivalent and air curing for minimum 6 hours and applying two coats of anticorrosive epoxy phenolic resin protective system iPNet RB or equivalent of approved make and quality comprises of resin and hardener mixed in equal proportion by volume with minimum-9-10 hours between the coats, sprinkling dry sand when 2 <sup>nd</sup> coat is tacky so as to provide rough finish and ensuring air curing of minimum 10 hours after the top coat before any subsequent treatment etc. including scaffolding etc. complete.	Sq.mtr	
5	<b>Corrosion Inhibitor Coat :</b> Providing and applying 2 coats of concrete penetrating hi-tech corrosion inhibitor system (KP 200 of M/s Krishna Conchem or Equivalent) that works on the Bipolar Inhibition Mechanism (B.I.M. B.I.M. in inhibits corrosion of steel in concrete at the poles, cathodic & anodic simultaneous reaction).	Sq.mtr	
6	<b>Application of Bond Coat-</b> Providing and applying priming cum Bonding coat of polymer of approved make and quality as approved by engineer in charge and cement slurry in 1:1 proportionate by weight to concrete area by brush or any other established method etc. complete.	Sq.mtr	
7	<b>Polymer Modified Mortar : 15mm-</b> Providing and applying 15 mm thick polymer mortar to load carrying R.C.C. members in two layers in proportion of 1:5:15 by weight of polymer latex of approved make and quality, cement and Quartz sand with required water cement ratio for desired consistency and applying and finishing by floating, curing after initial setting time, etc. as per manufacturers specifications Work shall be carried out as per the manufacturers specifications & certification this account shall be taken from consultant etc. complete.	Sq.mtr	
8	<b>Polymer Modified Mortar : 30mm-</b> Providing and applying 15 mm thick polymer mortar to load carrying R.C.C. members in two layers in proportion of 1:5:15 by weight of polymer latex of approved make and quality, cement and Quartz sand with required water cement ratio for desired consistency and applying and finishing by floating, curing after initial setting time, applying bonding coat for 2 <sup>nd</sup> coat etc. as per manufacturers specifications. Work shall be carried out as per the manufacturers specifications & certification this account shall be taken from consultant etc. complete.	Sq.mtr	
9	<b>Fiber Wrap</b> Strengthening structural element with nonmetallic composite fiber wrapping System comprise, of glass or Carbon fiber sheet and compatible saturant, by dry/wet/wetup system including Surface preparation : Grinding moulding concrete substrate, cleaning it with wire brush removing oil, laitance if present, rounding sharp edges to min 25 mm radius etc. complete. Profiling: Applying compatible primer on prepared substrate, Filling the holes and uneven surface with bituxoproc. Complete Wrapping: Wrapping the fiber sheet to structural element desired orientation using tamping roller to avoid any voids etc. repeat the same procedure for multiple layer with the interval of 8 hrs. Sand padding Apply in second coat of saturant after min. 12 hrs. rectify air voids if any past the river sand on it to make surface rough to take any further finishes (Material Make : SRMP/LOR KRISHNA CONCHEM) Providing and applying PC putty on honeycomb/uneven surface to make it even and smooth to receive further finishes like fiber wrapping etc.	Sq.mt	
a)	600 GSM Bi-directional glass fiber sheet For Slabs	Sq.mt	
b)	900 GSM Uni-directional glass fiber sheet for Beam & Columns junction	Sq.mt	
10	<b>Low Viscous High Molecular Weight Epoxy Grout -</b> Providing and injecting high molecular weights upper low viscous (3 to 5 cps) 0.56 Kg/Sqcm epoxy thermoset resin monol (Krishna Conchem or equivalent) for RCC members in appropriate proportion as per manufacturers specifications into cracks/ honeycomb areas of concrete including 12 mm dia, 50 to 75 mm deep holes in staggered manner or as directed by the consultants in RCC structural element. Cleaning of holes. Clean the holes air blower prior to fixing nozzles. Fixing of Nozzles: Insert 12 mm dia, PVC nozzles in cleaned holes. External end of nozzles to be machine to receive outlet of grouting gun. Fix it inside the holes by applying cement putty to ensure complete sealing. Grouting the slab by Mechanical Pressure Grouting using Rohib's Injector till the grout flows inside the slab. Cutting the grouting nozzles and sealing the Joints using sealant Material Consumption approx. 300mm per grout hole depends upon honeycombing and cavities	Kg	
11	<b>Polymer Cement Grout-</b> Providing and injecting high performance no shrink, free from high strength antiwash Polymer cement grout of Krishna Conchem or Equivalent by addition of water as per manufacturers specifications into honey combing areas/porous concrete including drilling of holes minimum 50mm in concrete, fixing nipples, injecting grout by suitable pump at pressure of 2.0 Kg/Sqcm and subsequently cutting / removal of nipples and sealing of holes with epoxy putty EPW 1010 etc. as directed by engineer incharge.	Kg	
12	<b>Microconcrete-</b> Providing and laying Super fluid Microconcrete of Grade M35-Roffe crete repairs (or equivalent as specified in the List of Brand names) in beam bottoms, columns, slabs etc. including mixing with 5mm to 10mm size aggregates, waterproof ply wood shuttering, pouring, leveling, Consolidating, curing etc complete as per Manufacturer's specification and Consultants Instructions. The item shall be paid on actual consumption of Micro concrete.	Kg	
<b>B</b>	<b>CIVILWORK</b>		
1	<b>External Plaster-</b> Providing sand faced plaster externally concrete, stone or brick surfaces using approved screened sand including preparing the base, watering and applying base coat of 15mm thick in cement mortar 1:4 using supercon-100 as melamine based super plasticizer 1 % by weight of cement, knif synthetic fibre a additions at 125 gm/bag of cement and sulumex-1000 of Krishna Conchem Product and curing the same for not less than 2 days and keeping the surface of base coat rough to receive the sand faced treatment not to exceed 8mm thickness in cement mortar 1:4 and finishing the surface by taking out grains and curing for 14 days and scaffolding etc. complete c) On RCC area as per Sr. No. 02 d) Additional provision for tank wall and bottom (patches)	Sq.mt	
<b>C</b>	<b>WATERPROOFING -</b>		
1	<b>Internal Surface of Water Tank-</b> Providing waterproofing of wet areas with Bathseal System of Dr. Fixit (regular option) including mechanically clean the RCC slab surface and side walls with wire brush / coil brush to free from all loose material like dust, loose particles, dirt, etc. Seal all honeycomb pits holes, joints, pile outlets with polymer modified mortar 1:5:10. Also apply a coat of PVC/ OI pipes Dr. Fixit Bathseal tape or Equivalent. Apply first coat of Dr. Fixit Pidifin 2K (or equivalent) and allow it to dry for 6 to 8 hrs. After drying of first coat, applying second coat and sprinkled coarse sand on vertical surface. The Pidifin 2K should continue for full height. Allow 24 hrs for full cure. Apply 12-15mm waterproof plaster on slab and vertical surface before admixed with Dr. Fixit Pidproof LW+ (or equivalent) dosage 200ml per bag of cement. Cure the surface with water. Work shall be executed by certified applicator only and work shall be guaranteed for minimum 5 years.	Sq.mt	

## Home loan set to get cheaper for borrowers

**NEW DELHI:** The Reserve Bank of India (RBI) in its monetary policy announcement on Wednesday kept key interest rates at hold, but its observations on Marginal Cost of Funds based Lending Rates (MCLR) may bring cheers to Pre-April 2016 home loan borrowers. The home loan rates of the Pre-April 2016 have not been revised by banks in line with market rates. These home loan borrowers, who were stuck in the older base rate regime, will now be linked to the current market-linked benchmark.

RBI will issue necessary instructions in this regard by the end of next week. In its policy statement, RBI has asked banks to link the base rate to MCLR from April 1, 2018 to ensure expeditious transmission despite the Reserve Bank of India highlighting this concern in earlier monetary policy statements. "Since MCLR is more sensitive to policy rate signals, it has been decided to harmonise the methodology of determining benchmark rates by linking the Base Rate to the MCLR with effect from April 1, 2018," RBI said. Former RBI governor

Raghuram Rajan introduced the MCLR to calculate the benchmark lending rate in another attempt to make banks pass on policy rate cut benefits to borrowers quickly and in a more transparent manner. Under the base rate and BPLR, banks were following individual methodologies for computing the minimum rate at which they could lend. Under the MCLR, RBI asked all banks to follow the marginal cost of funds method to arrive at their benchmark lending rate. MCLR is calculated after factoring in banks' marginal cost of funds (largely, the interest at which they borrow money), return on equity (a measure of banks' profitability), and negative carry on account of cash reserve ratio.

## Auto Expo 2018: Twenty Two Motors rolls out new electric scooter flow

**GREATER NOIDA:** Electric two-wheeler maker Twenty Two Motors on Thursday launched a smart electric scooter, Flow, priced at Rs 74,740 at the Auto Expo here, and plans to roll out over 2 lakh units in three years. The startup, which wants to make the most of the growing EV movement in India, will make its manufacturing facility in Haryana operational by the second quarter and will roll out 50,000 vehicles per year with an investment of USD 70 million. "We are going to start the production with 300 scooters per day and in the first three years we will roll out 2 lakh electric vehicles," Twenty Two Motors CEO and cofounder Parveen Kharb told reporters here. The vehicle is enabled with artificial intelligence and can be tracked remotely. The inbuilt 'Geo Fencing' allows security against theft as the vehicle alerts the owner once it is beyond the defined geographical boundaries. Kharb said the company is not only aligned with the government's vision of 40 per cent private electric vehicles, but it is ahead of it. Powered by a lithium-ion battery, Flow can be charged fully within 5 hours and can go up to 80 kilometres at a speed of 60 kilometres per hour. Pre-bookings of the vehicle commenced from yesterday and the delivery will be done by the second quarter of 2018. Twenty Two Motors is among the 12 startups that have participated in the Auto Expo that kicked off Wednesday on the outskirts of the national capital. Other features include 100 per cent LED Lamps, twin disk brakes, portable wireless battery, smart app, cruise control and reverse mode, among others.

Shatabdi, Rajdhani, Duronto trains to have 4 CCTV cameras in every coach. **NEW DELHI:** All coaches of the Shatabdi, Rajdhani and Duronto trains will soon have four CCTV cameras each to ensure passenger safety, a railways official said. Twenty-three pairs of Rajdhani, 26 pairs of Shatabdi and 18 pairs of Duronto trains would have the facility, he said. "All Rajdhani, Shatabdi and Duronto train coaches are to be fitted with CCTVs -- one each on the (two) entry gates and two in the gallery (corridor)," Vishvesh Chaube, General Manager, Northern Railway, said at a media briefing. Around Rs 3,000 crore were allocated in the 2018-19 Union Budget to install CCTV cameras in more than 11,000 trains eventually, officials said. They added that the ministry was also looking at different options to fund the project, includ-

ing market sources. The project would eventually extend to cover all the premier and suburban services and the 8,500 stations in the railway network. Chaube, however, said the money for the project would come from the Nirbhaya fund. He added that the Northern Railway had achieved a total original earnings of Rs 15,841 crore in 2017-18 (till January), compared to the Rs 15,663 crore registered in the previous year. This year's budget announcement has scaled up investments by almost three times to Rs 1,48,528 crore in 2018-19 as against the Rs 53,989 crore in 2013-14. The highest priority has been given to passenger safety with the total expenditure planned under this head amounting to Rs 73,065 crore.

## JioTV to broadcast Winter Olympics

**MUMBAI:** Popular TV App JioTV announced yesterday it has been awarded India digital rights of the upcoming Winter Olympic Games by the International Olympic Committee (IOC). JioTV will work with the IOC to provide comprehensive coverage of the Games in India, thus enabling millions to access live and catch-up content on their mobile devices, on the move, a media release said. The Olympic Winter Games are scheduled from February 9 to 25 at PyeongChang County, South Korea. Featuring 102 events in 15 sports, including skiing, skating, luge, ski jumping, ice hockey and snow boarding, the Games will see participation from more than 90 countries, including India. Luger Shiva Keshavan and cross country skier Jagdish Singh will represent India. In addition to working with JioTV, the IOC's multi-platform media destination,
